

When Quality **Matters**

Industrial Machine **Knives**

Sheffield Gauge Plate is a leading provider of shear blades and machine knives for a whole range of businesses across Sheffield and the UK. Whatever make or model of machine you use, we can provide a blade that will fit and provide lasting precision.

At Sheffield Gauge Plate, we don't just manufacture blades; we focus on creating the perfect machine knife to suit every client. With our superior material selection, precise machines and uncompromising heat treatment process, we're able to produce blades that won't dull with use and can provide precise incisions and large-scale cutting for many years.

Ultimately, a machine knife from Sheffield Gauge Plate will provide lasting results and save you money in the long run. You won't have to replace or repair the blade and can use it to get fast, effective results. Our industrial machine knives can be used for a range of purposes and are a popular choice for companies worldwide throughout a wide range of industries. Contact us today to find out more about our range of industrial blades and how we can find the right one for your business.

At Sheffield Gauge Plate, we pride ourselves on quality, which is why our machine blades are manufactured from the highest quality steel and heat-treated to create the perfect cutting edge. Our focus on quality is renowned by manufacturing companies around the world, who rely on our products to power their production process. Whether it's a small factory or a market leader, and whatever your industry, no job is too big or small for us.

Top-Quality **Machine Blades**

Machine blades inside material processing machines and shredders often have to pulverise or cut hundreds of tonnes of metal, plastic or wood throughout their lifetimes.

To ensure precision cutting for many years, you need blades that are made from quality tool steel and processed correctly to give them the right attributes.

Sheffield Gauge Plate takes great pride in using only the finest raw materials for all our machine blades and rotor knives. Our tool steel is sourced from the UK and EU countries, ensuring that we only utilise the highest quality raw materials to manufacture our blades.

With our high-quality blades, you'll be able to rely on your shredders and granulators for years to come and get the right outcome for each project.

Every part of the machine knife manufacturing process is carried out in-house by the Sheffield Gauge Plate team. From supplying the raw materials to carrying out the manufacturing process and quality control, we can ensure that every blade we make is perfect.

All manufacturing is done with the latest CNC machinery alongside traditional heavy-duty precision-grinding machines to ensure we produce the best machine knives and guillotine blades on the market. Additionally, our state-of-the-art in-house heat treatment facilities allow for total control over every stage of the process.

Machine Knives To Fit **Any Make Or Model**

When you need a replacement machine blade, you need it fast. Any delays could result in a loss in revenue, which is why Sheffield Gauge Plate keeps blades and knives for many of the most popular makes and models in stock.

Whether you have a machine made by Haco, Pearson Edwards, Waltons, AFM, Elga, Simat, Simeron, Adira or K&B, we have the machine blades for you.

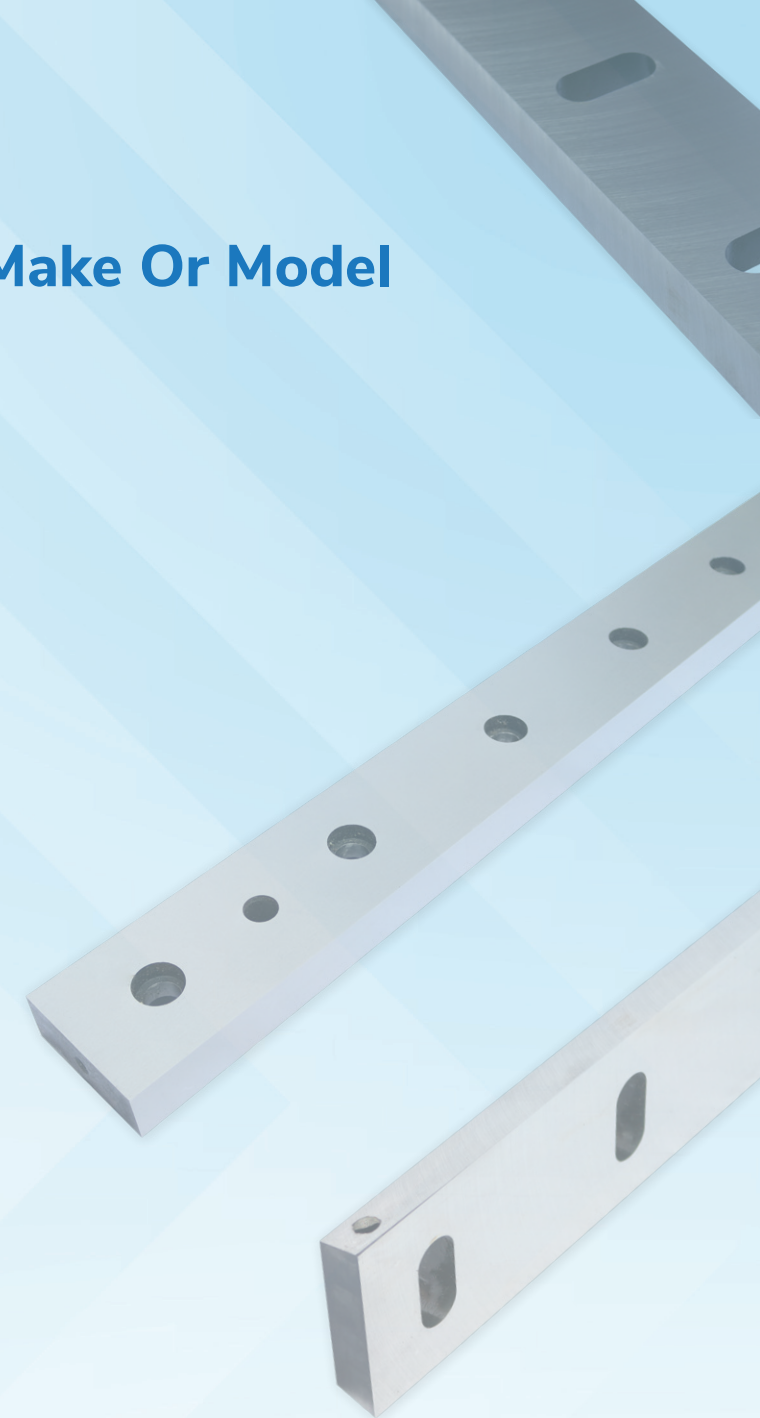

Our team work alongside these firms to ensure that we always know the OEM specifications for the most popular models on the market.

If we don't have the blade you need in stock, we have the capability to manufacture bespoke blades to suit your bespoke requirements. Sheffield Gauge Plate also offers a reverse engineering service for any blades where manufacturing details may have been lost. If you're ready to partner with us, get in touch today.

Alongside our shear blades and machine knives, Sheffield Gauge Plate also supply granulator blades, demolition blades, chipper knives, pelletizer knives, ground flat stock, screens, nuts, bolts, washers and tool steel solutions.

Thanks to our in-house facilities, we can custom-make anything you need, making us the only supplier you'll ever have to work with.

Over the years, we've worked with some of the world's leading manufacturers and recycling companies, and our solutions have been used globally. So, whether you're a small plant or an international corporation, we've got everything you need.
